

moisturizers and sunscreens

Moisturizers are vital to every skin care regimen regardless of skin condition, and do more than just moisten dehydrated skin. Emollients (usually lipid substances) help lubricate skin while making it soft, pliable and smooth. Moisturizers also help to protect the skin's natural defenses against the environment while controlling moisture loss from the skin. This becomes more important as we age, when the Stratum Corneum's protective lipid barrier layer may be compromised, or slower in replenishing itself.

Dermalogica has a moisturizer for every skin condition; from chronically dry and prematurely-aging to skin with excess oil production and breakouts.

Dermalogica SPF moisturizers and sunscreens also help protect skin against UV exposure, the number one cause of skin aging from our exposome (lifestyle and environment). Unprotected skin will inevitably exhibit premature aging, wrinkles, hyperpigmentation and potential for skin cancer. The best defense is to limit daylight exposure and protect skin with Broad Spectrum SPF, as well as take other protective measures such as shade, clothing, and good common sense.

skin condition

All skin conditions.

description

An invisible Broad Spectrum physical sunscreen that blends easily on skin, featuring ultra-sheer Zinc Oxide. Ideal post-skin treatment.

top products to prescribe

- Multi-Active Toner
- Daily Skin Health Moisturizer

retail

1.7 US FL OZ / 50 mL

professional

6 US FL OZ / 177 mL

invisible physical defense spf 30

application

Apply liberally to face and neck, preferably 30 minutes prior to sun exposure. May be applied after moisturizer.

professional application

To complete a professional skin treatment, apply **Invisible Physical Defense SPF 30** following prescribed Dermalogica Toner and Moisturizer.

key ingredients

Ultra-sheer Zinc Oxide: adds blue light and Broad Spectrum UVA/UVB protection.

A Bioactive Mushroom Complex: helps soothe skin and reduce UV-induced redness and dryness.

Antioxidant Matcha Green Tea: helps fight free-radical skin damage from UV and visible light.

Argan Oil, Tocopherol, and Bisabolol: help provide soothing, antioxidant benefits.

Sodium Hyaluronate: (aka Hyaluronic Acid) helps hydrate skin.

benefits / top retailing points

Blends easily on all skin tones.

Defends skin against UVA/UVB/blue light.

Soothes all skin types, including sensitive.
