

skin condition

Dry, dehydrated or prematurely-aging skin.

description

Next-generation moisturizer with Active HydraMesh Technology™ infuses skin with 48 hours of continuous hydration and helps protect against environmental stress. This best-selling moisturizer features a state-of-the-art complex that works on a molecular level to infuse skin with 48 hours of vital moisture and reduce Trans-Epidermal Water Loss (TEWL). This advanced technology also helps shield skin's natural microbiome from environmental stress.

skin smoothing cream

application

After cleansing and toning, apply over face and throat in light, upward strokes. Use twice daily, morning and night.

professional application

- 1 Following the application of prescribed Dermalogica Toner, apply **Skin Smoothing Cream** evenly to the face and throat and blend with the fingertips.
- 2 Customize with prescribed Dermalogica Concentrated Booster and follow with prescribed Daylight Defense.

key ingredients**Active HydraMesh Technology™:**

This state-of-the-art complex works on a molecular level, forming a hydrating mesh-like surface over skin to help reduce Trans-Epidermal Water Loss (TEWL) as it infuses skin with **48 hours of vital moisture**. It also helps shield skin's natural microbiome from environmental stress.

Active HydraMesh Technology™ hydrates and protects skin in two phases. A state-of-the-art **biopolymer micro-network** forms a protective "second skin". Then, a powerful **moisturizing complex** held within the network is gradually released to hydrate skin for 48 continuous hours.

Vitis Vinifera (Grape) Seed, Ascorbyl Palmitate (Vitamin C) and Tocopheryl Acetate (Vitamin E): antioxidants that help reduce free radical activity and defend skin.

Malva Sylvestris (Mallow), Cucumis Sativus (Cucumber) and Arnica Montana Flower: extracts that help soothe and hydrate the skin.

Aloe: moisturizes, prevents healing and helps prevent the appearance of dehydration lines.

benefits / top retailing points

Infuses skin with 48 hours of vital moisture.

Distributes hydration throughout the skin to lock in moisture.

Shields skin's natural microbiome from environmental stress.
