

your safety matters

Here's what we're doing to keep you safe:

dermalogica principles of advanced service safety

- 01 We prescreen clients and employees for sickness and contact with confirmed COVID-19 cases.
- 02 We recommend that clients in high-risk, vulnerable groups not get treatments.
- 03 We maintain physical distancing in common areas.

- 04 Masks are required in common areas. We wear clean masks, face shields and aprons during treatments.
- 05 We wash and sanitise hands repeatedly.
- 06 We recommend thorough hand washing instead of gloves.

- 07 We disinfect professional use products after each use.
- 08 Our beds are clean with freshly laundered linens for each client.
- 09 We clean and disinfect all equipment and surfaces before use.

- 10 We store clean and dirty items and tools separately.
- 11 We disinfect high-touch areas at least hourly.
- 12 We clean retail testers before and after use, apply testers to hands and avoid jars.

let's get back in touch

Your best skin ever is within reach!
We hope to see you soon.
