

Skin Pollution Widget

The skin pollution widget is a powerful tool and conversation starter that you can use to promote Daily Superfoliant. Based on a user's location, the widget returns a Skin Pollution Index and an associated risk of accelerated skin aging. You can preview the tool by visiting <http://www.skinpollution.com>

| Skin Pollution Index | Risk | Product |
|----------------------|-----------|--------------------|
| 0-19 | Low | Daily Microfoliant |
| 20-39 | Moderate | Daily Superfoliant |
| 40-59 | High | Daily Superfoliant |
| 60-79 | Very High | Daily Superfoliant |
| 80-100 | Hazardous | Daily Superfoliant |

Perhaps the most exciting opportunity is that we've built this as a widget so you can use it on your own website. Note, you may need to ask your webmaster or IT professional for assistance.

Embed Code

```
<script id="dermalogica-skinpollution-script" type="text/javascript"
src="https://www.skinpollution.com/js/skinapi.js?track_code=UA-36853599-
5&microfolianturl=http://www.dermalogica.com&superfolianturl=http://www.dermalogica.com"></script>
<div id="dermalogica-skinpollution-widget"
style="position:relative;height:1100px;width:100%;overflow:auto"></div>
```

Customize the Product referral link to point to your website

Replace <http://www.dermalogica.com> URL with your website URL and ideally the product page on your website.

Customize the size of the widget to fit on your website

Adjust the height and width of the widget by modifying the height and width values within the embed code.
