REAWAKEN

THE NATURE OF
YOUNGER-LOOKING SKIN

reawaken the nature of younger-looking skin...

Research suggests that up to 50% of visible signs of skin ageing come from your exposome. Your exposome includes factors such as climate, UV exposure, pollution, sleep, diet and stress.

NEW Phyto-Nature Firming Serum helps bridge the gap by combating the appearance of exposome-driven skin ageing. This dual-phase serum works both quickly and over time to flash-firm, lift and revitalise skin while reinforcing its defences against your exposome. It is also clinically proven to double skin's luminosity and minimise the appearance of fine lines after just 1 application, while reducing visible wrinkles in 4 weeks.*

*An 8-week clinical study was carried out using a reputable Contract Research Organisation with 32 panelists.
