

pro power peel

We are super excited that you have chosen to offer **Pro Power Peel** services to your customers. Here are a few tips to introducing this line of professional peels at your skin centre.

1. Check with your local authority to make sure you have the correct business license to provide peels.
2. Inform your Insurers so that you have liability cover in place. You can use our Information Fact Sheet for Insurers to provide them with the necessary information.
3. Review your Health and Safety practices and protocols to safeguard staff and clients. The Safety Data Sheets provided for each formula will give you guidance.
4. Implement a compulsory consultation, 24 hour patch test and post care procedure that protects the client and meets your insurance requirements. The Dermalogica Consultation Card now includes Consent for Peels and relevant questions. Dermalogica provides a Post Care Kit to support skin recovery and a Post-Care Instructions Sheet for the client to take away after the service.

dermalogica PRO®

THE PRODUCTS CONTAINED IN THIS PACKAGE ARE **HIGHLY ACTIVE.**

Please ensure that you receive proper training prior to performing Pro Power Peel treatments.

 - o For the Training Manual, visit the Product Manuals page.
 - o For the Training Videos, visit the Video Library page.
- Your local training centre or business consultant.

guidelines and contraindications

Before beginning the Pro Power Peel, assess your client's skin health and complete a thorough consultation. **All clients must complete and sign the Dermalogica® Consultation Card.** This treatment procedure cannot be safely performed until this has been completed.

Never perform Pro Power Peel on a client who:

- Has received a resurfacing skin procedure such as laser, light therapy, microdermabrasion or chemical peel within the past two weeks
- Has received Botox or other injectables within the past week
- Has used Retin-A within the past 48 hours
- Has used Isotretinoin (Accutane) in the past six months
- Has waxed within the past 72 hours
- Has a contagious skin disease or infection such as an active cold sore
- Is pregnant or lactating
